

Joseph C. Kvedar, MD

Professor, Harvard Medical School

Senior Advisor, Virtual Care, Partners HealthCare

Editor, npj Digital Medicine

At Partners HealthCare, Dr. Joe Kvedar has focused on driving innovation, creating the market, and gaining acceptance for connected health for nearly three decades. He is now applying his expertise, insights, and influence to advancing adoption of telehealth and virtual care technologies at the national level.

He is Professor of Dermatology at Harvard Medical School, President-Elect of ATA (The American Telemedicine Association), Co-Chair of the AMA's Digital Medicine Payment Advisory Group, and Editor-in-Chief of *npj Digital Medicine*, a *Nature* Research journal.

He is the author of two books on digital health: [The Internet of Healthy Things](#) (2015) and [The New Mobile Age: How Technology Will Extend the Healthspan and Optimize the Lifespan](#) (2017). The [cHealth Blog](#) provides his insights and vision for digital health.

Dr. Kvedar is an advisor to and serves on the board of several Venture Capital Firms and digital health companies.
